

SUBWOOFER CABLE

HIGH END DELUXE
★★★★★

made in 
GERMANY

The elegant looking HIGH END DELUXE subwoofer cable impresses with its symmetrical structure. The two copper conductors consist of fine, lacquered copper strands and are covered with foamed PE material. Two separate PE pipes stabilize the cable. This cable architecture reduces unwanted capacities to a minimum and ensures a neutral and low-loss signal transmission without placing unnecessary strain on the amplifier.

- Symmetrical design
- High Speed copper conductor
- Fine, lacquered 0,10 mm copper wires
- Foamed PE insulation
- 2 pieces of stabilizers (PE tubes)
- Dense, braided shielding made of copper
- PVC coat + textile braid
- Cable diameter 6,5 mm
- Solid, 24k gold-plated full metal connector
